SFX LOW LOSS COAXIAL FOR EXTENDED DISTANCE

This high frequency, low loss cable range is designed to carry CCTV, TV and Satellite signals.

This high frequency, low loss cable range is designed to carry CCTV, TV and Satellite signals. They are manufactured with gas injected foam which grants the cable a much better mechanical, electrical and ageing performance compared to a solid PE dielectric. This family of cable contains both a foil and braided screen enhancing performance and reducing interference. They are also manufactured with a larger conductor size should further distance be required.

SFX125 is stocked on bulk drums therefore we offer a cut to length service.
